Subject: RE: Clarion

That's good because I'm getting ready to send out for 45-day review TMS (located at USS Edgar Thomson). The same comment was made and I want to be sure we're okay with everything before I send it to you. For discussion tomorrow, here our proposed response to the comment on regulatory authority:

The emissions limits for Operating Permits that come from Installation Permits are authorized under Article XXI, §2102.04.e. All new sources under an Installation Permit are required to meet Best Available Control Technology (BACT) under §2102.04.b. The authority to include these conditions in an operating permit is under §2103.12.a.2.D. For limits not from an Installation Permit, Article XXI requires all sources to meet Reasonably Achievable Control Technology (as defined in Article XXI, §2101.20) under §2103.12.a.2.B. Section 2103.12 is included under the Allegheny County Health Department's approved Title V operating permit program as well as the Federally Enforceable State Operating Permit (FESOP) program, included in the Pennsylvania State Implementation Plan (SIP).

Hi JoAnn-

I'm going to join the call tomorrow and we can talk about Clairton if that's ok with you. I'll hang on to the slot on Friday in case we don't get to it, and cancel if we do.

David Talley
Environmental Engineer
Air and Radiation Division
Permits Branch 3AD10

Clarion or Clairton (we have both)? I have the regular standing meeting (ostensibly) with Riley on Thursday 8:30-9:30. I'm free between then and 2:00 pm. I am available any time on Friday.

Hi JoAnn-

I'd like to set up a call to discuss Clarion. Do you have some availability next Thursday or Friday?
